

1666.

# Apollo Anglicanus.

## THE ENGLISH APOLLO:

Astronomically observing, and  
Astrologically demonstrating, those  
grand Catastrophes, and superlative  
Actions designed by the Heavens  
to be manifested in the World  
this present Revolution.

Also, Some Observations of the late COMETS.

With necessary Tables plain and useful.

As two fold Kalendar; viz. Julian or English,  
Gregorian or Roman Computations, more plain and  
tall than any other; with the Moon's Rising  
Setting, and Southing dayly observ'd.

Being the second after Bissextile or Leap year.

By RICHARD SAUNDERS  
Student in Physick.

*Cognosce alia, ut te cognoscas; cognosce teipsum, ut cog-  
noscas Deum.*

*Esse Deum in Cælo revelatur arcana quæ ventura sunt in No-  
vissimis Temporibus. Annus hoc scribo, non Auspicio.*

LONDON, Printed by E. Gales, for the  
Company of Stationers, M. DC. LXXI.

A Table shewing how many years Purchase a Lease or Annuity, to endure for any Term of years under 33 is worth presently at Interest upon Interest at six in the hundred: and shewing plainly how to discount any Lease in Being, and the true value of the Reversion after any number of Years.

The ule and Explanation of this Table.							
Years of a Lease.	Years.	Months.	dec. par	The first Column towards the left hand, sheweth the years of a Lease or Annuity, and right against each Year, is the Years Months and Decimal parts of a Moneths purchase, that such a Lease or Annuity is worth.	Years of a Lease.	Years.	Months.
1	0	11	0	The first Column towards the left hand, sheweth the years of a Lease or Annuity, and right against each Year, is the Years Months and Decimal parts of a Moneths purchase, that such a Lease or Annuity is worth.	17	10	5
2	1	9	9		18	10	9
3	2	8	1	<i>Example.</i> Suppose a Lease or Annuity to continue ten Yeares, and you would know how many yeares purchase it is worth in present money, look in the Table for ten yeares of a Lease to the left hand, and against the same you shall find 7,43 which sheweth such a Lease to be worth seven yeares four months, and three tenth Parts of a Months purchase.	19	11	1
4	3	5	9		20	11	5
5	4	3	9	Again, are you to take or buy the Reversion of any Lease or Annuity, work thus, Suppose the Lease to be thirty yeares in all; you find in the second Table, and right hand against thirty, 13 yeares 9. monthis, and two tenth Parts of a moneths purchase; this it were worth, were it in present possession. But suppose there be a Lease of five yeares (more or less) before your Commence; look in the Table against the five Yeares, and there you find four Yeares, two Moneths, five tenth parts, halfe a Moneths purchase; take this out of the sum against thirty, which is 13,9,2 4,2,5. The remainder is 9. yeares six moneths, seven tenth parts of a month; and so much is the Reversion after five yeares worth, the remainder of thirty yeares. This is usefull and very easie.	21	11	9
6	4	11	0		22	12	0
7	5	7	0	Again, are you to take or buy the Reversion of any Lease or Annuity, work thus, Suppose the Lease to be thirty yeares in all; you find in the second Table, and right hand against thirty, 13 yeares 9. monthis, and two tenth Parts of a moneths purchase; this it were worth, were it in present possession. But suppose there be a Lease of five yeares (more or less) before your Commence; look in the Table against the five Yeares, and there you find four Yeares, two Moneths, five tenth parts, halfe a Moneths purchase; take this out of the sum against thirty, which is 13,9,2 4,2,5. The remainder is 9. yeares six moneths, seven tenth parts of a month; and so much is the Reversion after five yeares worth, the remainder of thirty yeares. This is usefull and very easie.	23	12	3
8	6	3	5		24	12	6
9	6	9	6	Again, are you to take or buy the Reversion of any Lease or Annuity, work thus, Suppose the Lease to be thirty yeares in all; you find in the second Table, and right hand against thirty, 13 yeares 9. monthis, and two tenth Parts of a moneths purchase; this it were worth, were it in present possession. But suppose there be a Lease of five yeares (more or less) before your Commence; look in the Table against the five Yeares, and there you find four Yeares, two Moneths, five tenth parts, halfe a Moneths purchase; take this out of the sum against thirty, which is 13,9,2 4,2,5. The remainder is 9. yeares six moneths, seven tenth parts of a month; and so much is the Reversion after five yeares worth, the remainder of thirty yeares. This is usefull and very easie.	25	12	9

Charles 2	1630	1649, Jan. 30	19 1	Not known	Not known

This Table tells us of our Kings Birth,  
 When 'gan to Reign, how long they sway'd on Earth  
 In Pageant glories, real cares and pains,  
 And last recounts the end of all their Reigns.  
 Conclude in Dust, oh sad! what's learned here?  
 But Divine remembrances that once they were  
 Of Twenty six, doth only one remain,  
 Whom God preserve, grant long and prosperous Reign.

Forwarn'd, & forewarn'd, the Terms approach you see;  
No Musick's sweet, like Angels Harmonie.

*Hilary* Term begins *Jan.* 23. and ends *Feb.* 12.

Return or Revoir days.	Exception Days.	Return vium.	Days of Ap- pearance.

The Law is good, like Arms, the way to peace;  
Peace bringeth plenty, makes our sorrows cease.  
If Truth and Justice with it go along,  
You need not much amongst the Lawyers throng.

Both Law and Arms, I honour each Profession,  
They're better in their ends, then in possession,  
But if you nothing bring, away be gon;  
Full pockets now are only lookt upon.

*Directions for the subsequent Diary, or Almanack.*

1. **I**N the first column to the left hand, on the left hand page you have the Numerall figures of the days of the Month.

2. In the second column you have the week days, and Dominical Letter.

3. You have all the principal and observable Saints days and others; the places of the Planets, and the Moon most nights, with what fixed Stars she is with, is observed, by which the Asterisms and constellations are easily known to an ingenious eye and understanding.

4. The Moons place in the Zodiack every day at noon.

5. The age of the Moon, by which the Tides are known.

6. The rising or setting of the Moon, every day in the year.

7. The general state of the weather, with much care performed by the Author.

8. In the 8. column, the first on the right hand, you have the English account. In the 9. the Forzin. In the 10. the Roman week days, and Sunday Letter.

11. The perfect Roman Kalender and Saints days.

12, 13, and 14, the utmost to the right hand, you have the day rising and setting of the Sun.

*A Table to find when the Moon will be full South every day this year, whereby the time of Tides is exactly known.*

**M. A. H. b. f.** First find her age in the 5. column of the Almanack, which is exactly every day noted; which age seek out in one of the two columns of this Table to the left hand, against which in the third and fourth columns is the hour and minutes which show the time of the Moons being South.

As for Example, the 14 day of March the Moon is 19 days old, which being found in 2. column of this Table against 6, to the right hand it points to 3 h. 12 m. at which time the Moon is South the said 14 day of March, 1666. *Et sic de ceteris*

Here note, that all the increase she cometh to the South in the evening following the Sun; but in the decrease, in the morning going before the Sun.

By any Sun-dial you may know the hour of night by adding to the time of the Moon being South after, or subtracting before.

To find the time of high-water in most Coasts of England,  
**F**irst, as you before were taught, find at what time the Moon  
will be South, for then you may truly conclude it High-  
water at Southampton, Quindorough, and Portsmouth, for there  
the South and North Moons make a High-water. But when  
you desire the time of Full Sea in any of the following Coasts in  
the ensuing Table, find the name of the place, and see how many  
hours and minutes be annexed thereunto in the column under  
*U.M.* which added to the time of the Moons coming to South,  
gives you the time of High-water for the place required.

A Tide-Table, with the Names of the Havens.

<b>R</b> ocheſter, Maldon, Aberdeen,	0 45
Graveſend, Romney, Ramkins,	1 30
London, Timmouth, Hartlepoole,	3 0
Friſh, Leith, Dunbar, Warbon,	4 30
Newcaſtle, Pulmonih, Linmber,	5 15
Lin, Antwerp, Plimouth, Hull,	6 0
Briſtol, Lanion, Faulneſſe,	6 45
Milford, Bridgewaten, Norſh-coaſt,	7 30
Portland, Peterport, Harſlow,	8 15
Dover, Yarmouth, Harwich, Dublin,	10 30
Caſſice, Rye, Wincheſſey, Caſſar.	11 15

Ex:mp:le.

**T**He 14 of March this year, it is required to know the time  
of Full Sea at New-caſtle: by the Kalender over againſt the  
14. of March, in the fifth Column, I find the Moon nineteen  
days old, and by the foregoing Southing-Table, I find the  
Moon South at 3 hours 15 minutes in the morning; then in  
the preceding Table, againſt Newcaſtle I find 5 hours 15 mi-  
nutes, which added to 3 hours 15 minutes, the aggregate is  
8 hours 30 minutes, wherefore I conclude it High-water there  
at 8 hours 30 minutes in the morning: ſo of any other.

Take notice that the Tide floweth one point of the Compaſſe  
more at the Spring-Tide (which is the New and Full Moons)  
then at the Neap Tides (the firſt and ſecond Quarters) as alſo  
the latitude of the Moon, and Winds, may alter it an hour  
ſooner or later; let it be their providence who depend upon  
the Tides, to make timely proviſion.

*The Tides like ſtormous Humors never reſt,  
Still conſtant in unconſtancy at beſt.*

# A PROGNOSTICATION

Of the Comets 1664 and 1665, and Eclipses  
this present Year 1666.

**T**here will be this present Year seen by the Inhabitantes of this Earthly Globe Four Eclipses. Two of the *Sun*, and two of the *Moon*; — but of the first of the *Sun* will only be conspicuous in our *Horizon*.

The first Eclipe is of the *Moon* on the sixth of *June*, at seven hor. 25 min. in the afternoon, which time the *Sun* will be almost three quarters of an hour high in the *West* and the *Moon* as much under the *East Horizon*. So that it will be conspicuous in the more *Eastern* parts of the *World*, as in *China*, *India*, *Egypt*, *Assyria*, *Arabia*, *Chaldea*, and the *Tartars* Country; yet the end will be observed in *Germany*, *Italy*, *Sicily*, and the *Mediterranean Sea*. Those that travel those parts may make their observations.

The second Eclipe is of the *Sun*, the 22 of *June*. The *Sun* then will be Eclipsed visibly in the 1 deg. 25 min. of *Cancer*, conspicuously seen of us, & all *Great Britain*.

The beginning will be at half an hour after 5 }  
The middle thereof at above a quarter after 6 } in the morning  
The end above a quarter after 7 }

The digits or parts of the *Sun*s body that will be darkned to us, i. e. seven parts and a half of twelve will be dark. The whole duration will be almost 2 hours.

The third Eclipe is of the *Moon*, upon the first of *December*, and will be seen in the Longitude of 150 degrees between the Equinoctial and Tropick of *Cancer*, as the *Philippine* and *Moluccues*, and also in *Tartary*, the *Java's* and *Bengala*. This Eclipe happens after two a clock in the afternoon.

The fourth Eclipe is of the *Sun* the 15 of *December*, and will be visible onely in the Southern tract of the *Earth*, as, The *Magellanick* streights and parts adjacent; something by way of judgment of the Eclipses and the Comets preceding.

## *A Prognostication.*

*Experientia universalis testatur, Eclipses Regionibus damna, necnon hominibus incommoda plurima, principibusque plerunque mortem prae-significare.* Universal experience certainly informs us, that *Eclipses* pre-signifie (as well as *Conjunctions* and *Comets*) many and great evils, troubles, damages, and discommodities to the World, and principally to those Regions thereby signified, with death and mortality of Princes and persons of renown. I could easily demonstrate, that all the great changes and mutations in the World, as, sickness, famine, and grand evils, have in all ages, been the sad consequences of these secondary and pre-signifying causes; and that the wisest men and best authors in all the World, have in all ages predicted the sad consequents from these preceding signs and causes; but my limits forbid that prolixity. Therefore briefly, I have observed that the total Eclipse of the Moon in July, 1664. hapned in the 14 degree of  $\text{♋}$ , which was the tenth house of the City of London Radix, and the very degree of the Moon in that Radix; the effects of which began to operate last year 1665. and continued till the latter end of August, which in these words I observed in my Prognostication 1664. *Viz. This Eclipse falls in the 14 degree of  $\text{♋}$ , and is very formidable, and threatens much sorrow to the Western World. This is the very radical degree of the Moons Position in the Radix of London, and in the tenth Angle. It hath been the subject of my Inquisition (and I finde) for hundreds of years past, that never any Plague, contagious Diseases, Fires, Murthers, Seditions, Conspiracies, or tumultuous mischiefs, but hapned either when some eminent Conjunction, notable Eclipses, or other malevolent Position or Transits, were made in or near the Angles of the City Radix, viz.  $\text{II } 13$ ,  $\text{7 } 13$ ,  $\text{♋ } 8$ ,  $\text{♌ } 8$ , and therefore the preceding conjunction of  $\text{♄}$  and  $\text{♅}$ , and in  $\text{13 } 7$ , and this Eclipse in  $\text{♋ } 14$  do prodigiously threaten London with raging sickness, and other mischiefs, which I prayed God to avert.* Thus far then, which I the rather note, because we see it too severely verified in this great and last Contagion. This Eclipse being in the West Angle, in opposition to the

## SAUNDERS, 1666.

the Cities Ascendant, and the Moon at that very time in  $\varnothing$  to  $\hbar$  and  $\delta$ , who were radically in the fourth house. What could these (as I then shewed) intimate less then *Pestilence* and *Mortality*? Farther, In *January* 1664. here hapned another Eclipse of the Moon in the 12 degree of  $\Omega$ , near the Cusp of the fourth, and place of  $\delta$  in the City *Radix*,  $\hbar$  being Lord of the *Ascendant*, and near the same in the first House, and the influence of the Eclipse disposed by the two grand enemies of Nature,  $\hbar$  and  $\delta$ ; the effects of which likewise operated in *August* and *September*, the same year 1665. just with, and succeeding the former Eclipse, *July* foregoing. This likewise was a prodromus of perperacute contagious Fevers, Madness, Frenzies, *Pestilence*, *Plague*, unwholsome Airs, *Pestiferous* Winds, and the like. Besides those Comets appearing to admiration in *Decemb.* 1664. the beginning and end thereof; and in *March* following 1665. these also in their position, appearance and progress, near infallible precursors, and evident dictators of divine vengeance. Had I limits here to enlarge, I would give the world an account of their motions and appearances, but my scantling forbids it; onely thus much, the first of these Comets had its Diurnal motion from West to East; its Trepid motion from North to South, and observed in the last Decanate of  $\pi$ , in direct Square to the place of the Sun in the Cities *Radix*.

The second Comet observed in the latter end of *December*, to the beginning of *January* visible in  $\gamma$  and  $\nu$ , but most probable had its beginning in  $\Pi$ , the opposite place of the last conjunction of  $\hbar$  and  $\mathcal{U}$ , and the Radical Ascendant of the City, had the Skie been favorable to the observers.

The last that was seen (I cannot say it to be a third, but rather the appearance of the former again, having been obscure from our sight, *January*, *February*, and most part of *March*, by reason of the Suns proximity passing by the same, and obscuring it from our sight) was visible the latter end of *March*, the beginning of

### *A Prognostication.*

(65) on the 31 of *March*, by observation I found it to have 15 degrees of *Altitude* at four of the clock in the morning. It rose between one and two in the morn, with the beginning of  $\infty$ , and did culminate with the latter end of  $\times$  or beginning of  $\gamma$ , more North then the *Tropick* of  $\odot$ , in the *Body* of *Pegasus*, near the *Head* of *Andromeda*. All these were the immediate *Finger* of *God*, and the *Brandish Sword* of the *Almighty*, denouncing his wrath upon the *World* for sin. These were prodigious, yet legible characters in the *Heaven*, which shewed themselves to be observed by those that profess themselves our *Watchmen*, and understood by them that undertake to interpret the *Divine Will* to us, who should recal the *World* from sin, to turn to the *Almighty* by true repentance, like *Nineve*, whereby the great mortality might have been in whole or in part prevented.

As for these *Comets*, without question they presignifie great Mortality and Miseries to the habitable *World*; Nam nunquam Cælo spectatum impune Cometen, saith *Seneca*; and *Paulus Minervus*, Quotiescunque igitur Cometa in mundo apparuerit, toties orbi terrarum Angustiam pronuntiatio: Et tam diu Duraturus, quam diu Cometa perseverabunt durabuntque. Let not the *Country* think themselves privileged against the effects of these *Gods* judgments, whiles their sins remain, their hatred and cruelty to their *Brethren*, and scornful slighting the *Afflictions* of *Joseph*: For assuredly, these *Comets* are both causes and signs to them of ensuing wrath. I wish them to consider that *Plague* of *Lameness*, that of late years hath afflicted their *Gattel*, which is the same in specie with that which brings Mortality to Man. For know, that the pestilence generally derives its natural original from a *Crisis* of the *Earth*, whereby it purges it self by expiring those *Arsenical Fumes* that have been retained so long in her *Bowels*. Now before the pestilence can cease, the *Earth* must have purged her self through those transpirations which continue longer or shorter as the heat of the *Sun* doth assist her by attracting the said

said Fumes, or small Rains open her Pores, by relaxing her surface; whence it hath been observed, that the more small Rains have fell, the more the Mortality increased: So that we may rationally collect a pestilence to be originally nothing but a critical sweat of the Earth; therefore preceding long Frosts, which so long contract her Pores, mightily conduce to following Mortality. This is worth the consideration of the wise.

I had hoped we should have seen some rational account of these Comets signification before this by some able hand, but I finde none but scribbling pens have yet attempted it, which like a chip in broth, signifie nothing but shame to Art. Its well known to the World, that a great task this two years hath been incumbent on me, and doth yet remain in attending the Press. In reference to which, my whole time is taken up, and must be yet longer; after which (if the Almighty spare life) if I see it not better performed, I shall (God assisting) endeavor to let the World see the Latitude of their significations according to Reason and Art.

A word or two of that Eclipse of the Sun conspicuous to us June 22. this present year. The Sun suffers an Eclipse in the 12 and 11 Houses of Heaven in  $\square$  to  $\mathcal{J}$ , and  $\mathcal{P}$  to  $\mathcal{H}$ , in the sign  $\odot$ . *Plebis & ignobilium interitus, diuturnaque bellorum seditiones, & maritimarum & in aquore degentium perniciēs magna ingruet.* Let Holland look to her self, for this is a Solstitial sign, *Ex motuum mutationes, legum & Civium significat.* Its like to be a new world with them. Scotland likewise is herein concerned, and York shall feel the effects of it to her sorrow, as well as other places; but under the effects of this Eclipse, London, through Gods blessing, will flourish.

$\mathcal{H}$  in  $\nu$  *Malum erit in animalium genere in quibus homines plurimum delectantur.* Those Beasts which the Countrey men set their souls upon, shall be the subjects of their sorrow.

$\mathcal{U}$  in  $\nu$  *Malum erit in genere hominum & mortem nobilium significat, & multos dolores hominibus, & præ-*

## A Prognostication.

*eipue juvenibus.* Death and Misery to great and small, and chiefest to them in their full strength and greatest pride.

*Mars* in his Position signifies superlative mischiefs to men through *Quarrels, Captivities, Wars, Blood shed, Depredations, Trefts, Insurrections* by *Neighbours* and *Kinred*, *Depopulations, change of Laws* through *Violence.* *Et in re morborum.* High and great *Fevors, Pestilences* in many *Countreys,* *Et in seminibus que seminantur,* Scarcity and *Famine.* *Excitat etiam ventos calidos corporibus humanis, Tabificos atque Pestilentes, fulminum jaculationes borrendaque tonitrua, corruscationes & fulgura.* Pestilent Diseases amongst men; *Horrid Lightning* and *Thunder.* *Et Turbinescos precellososque nimbos, Turbulent Winds,* and mighty *Storms,* with a completion of all mischiefs.

*Venus* and *Mercury* signifie much mischief and prejudice to mens choicest cattel, mortality of *Mew* and *Women,* drying up of *Rivers,* death of *Fish,* and all manner of mischiefs. So that this is like to be a *Year of Wonders,* though I mention not the *Popes* 1666. This *Year* threatens *Treason, Death,* or more then ordinary mischief to *France.* *Sed Cynibius aurem vellit.*

*Homines sibi ipsis multa incommoda ob futurarum rerum ignorantiam inferunt.*

## Of the Four Quarters of the Year.

*Pronaq; cum spectant animalia cetera terram,  
Os homini sublime dedit, cœlumque tueri  
Fussit, & erectos ad sydera tollere vultus.*

When other Creatures on the ground do pore,  
Nature gave man a high erected look,  
The Heavens to view, and Deities to adore,  
And read the Characters in that fair Book.

### Of the Spring.

**Æ** *Quinoſtium vernale?* The *Spring Quarter* begins when the *Sun* toucheth the first point of the *Æquinoſtial* sign *Aries,* which this year is on *Saturday,* the tenth of *March,* at three quarters after five in the morning, equalizing day and night. The natural temper of this season is *hot* and *moist*; but if the weather vary and deviate from its proper temper, viz. as to be *windy* and *dry,* then its bad for old people, and *childe-bearing women*: If the *Spring* be very *wet,* expect multiplicity of dangerous *Agues* the *Summer* following, with *Frenſies, Vertigoes, Impoſthumes,* and the like; but if very *wet* and

and warm, with many South winds, its likely to breed dangerous and infectious Diseases. *Melancholy* persons are best in health this quarter; the *Sanguine* the contrary; its good for them to breathe a Vein; those diseases which proceed from excess or putrefaction of blood are most dangerous, but those distempers that have their original from *Melancholy*, are less noxious. Beware of taking Cold, Evening and Morning.

The Constitution of Weather you have each day in the *Kalender* Pages.

These three Months following constitute the *Vernal Quarter*, on which these Observations are necessary.

*March.*

**I**N this Moneth of *March*, for your health you may observe that it is good to use pleasant and well Spiced meats, and all things that purge and sweeten the blood, because then the blood stirs, and increaseth in the body: Sharp meats and drinks are to be shunned this Moneth; the pleasant and strongest wine is most commendable; eat often. Leek porrage is wholsom, to bathe oft is commended; not good to purge or bleed much this Moneth. Use to eat often the Herb *Penny-royal*, which heats the stomach, and helps digest on; and in Sauces and Sallets the Herb *Betony* is good, for it clears the sight, and strengthens the head; also Grains, Ginger, Nutmegs, Galingale, Pepper, and such like Spices be good and wholsome in meat and drink this Month.

*April.*

**I**N this Moneth the blood increaseth, wherefore to eat pleasant meats, and River Fish, and Sallets often, is commended; to Bleed and Bathe this Moneth very good, to purge the stomach by Potion or otherwise is good, but to eat any kind of Roots this Moneth is thought hurtful. All kind of Meat moderately taken, except Pigg, is counted good. Its safe to enter into Physick for any grief of the body, but drink moderately; because excessive drinking more contaminates the blood in this Moneth than in any other; to eat *Betony* and *Mints* prepared in Honey, and drink first in the

### *A Prognostication.*

morning before you eat any thing, and to drink sometimes the Herb of Grace in Wine is profitable; but beware of eating Salt Fish in this Moneth, for it fouls the blood, and breeds Itches and Scabs in the body.

#### *May.*

In this Moneth wash often thy face with fair running Water, but eat not of such meats as be hot in quality; good to bleed, especially in the Feet upon occasion. Beware of eating stale Fish, or rained Flesh; but eat your meals in due season, and drink but little Wine this Moneth; to drink clarified Whey simple, or drawn with cool Herbs, is very healthful unto hot stomacks: Sharp drinks are good; pure Wine mixed with Goats Milk to assuage both the head and breast, is greatly commended. Good to take Physick; not good to eat the Head or Foot of any Beast this Moneth; to drink Wormwood Wine is very good, used moderately, but otherwise it attracteth the lightest parts of the Humors, and leaves the mass of Humors more obstinate; eat Fennel Roots tenderly sodden, take gentle Physick, to purge the Blood and Body very good, and to sleep after Dinner this Moneth is not discommended.

#### *of Summer.*

**W**hen the Summer Quarter is dry and full of North Winds, and the Autumn succeeding rainy, and South winds frequent in it, then expect Coughs, Rheums, Hoarseness, and increase of Consumptions, with great pains in the stomach and head the Winter following. This Quarter is naturally hot and dry; the Flegmatick are best in health; Cholericke the contrary. This season favoureth old age, and debilitates youth. This Quarter takes beginning with us on Monday, June 11. 22 min. after eight in the Morning, causing to us, and all that live on this side the *Aequator*, longest days, and shortest nights. This is called Summer, *Quia tunc plus Solis*, because we have more of the Sun then at other times.

#### *June.*

In this Moneth abstain from such meats as do ingender flegm, and drink then of the pleasantest Wine, and

## SAUNDERS 1666.

and drink sometimes fasting, a Cup of *White Wine*, for it purgeth *choler*, and noxious humors from the *Stomack*. Good to eat *Sallets* of *Lettice* prepared with *Vinegar*; eat such meats as be light of digestion; and all this Moneth glut not the *Stomack*, but arise from the Table with an *appetite*: Arise betimes in the morning, and exercise your body with some long walk. You may bleed; beware of eating *milk*, unless the same be well sodden. Take heed of eating *Cheese* and *Apples* this Moneth: Not good to stay long in the *Bath*; to wash the *Feet* this Moneth often in cold *Water*, is commend-  
ed.

### July.

In this Moneth it is not good to eat *strong meats*, nor those which do greatly *nourish*, nor pleasant *spiced* meats, the season being hot. Beware of *bleeding* and *purgings*, yet both may safely be done, being guided by discretion. Drink but little *Wine* in this and the moneth following, for that it dries the *Stomack* and *liver*, and too much increaseth *choler*; the smallest and weakest drinks are best to be used fasting against *choler*. Abstain from *Venery*, and use to eat every morning a little *Sage* and *Herbgrace* with a bit of *Bread*. Beware of eating any *murdrif* *Fish* taken with Net this Moneth. Use to eat oft *Verjuice* with your *Sallets* and *Mear*, for the same doth cool and refresh the body. Refrain eating of green *Fruits* this Moneth. Its wholesome to anoint the Neck and Brest with the *Jayce* of *Herbgrace*, *Hyssop*, and *Smallage* mixt with *Honey*. If you *Bathe* do it fasting, and very moderately, for to do otherwise, is dangerous this moneth. And beware of eating either *Beets* or *Lettice* this Moneth, for that they have in them a *venomous* *peyisonous* quality, very noxious to nature. *Garlick*, *Onions*, *Sage*, and fat *Bacon*, is good for the *Husbandman*, and laborious bodies.

### August.

In this Moneth *Choler* with *Melancholy*, *Atta bilis* much increaseth, from whence come lasting *Agues*, and *Fevers* hardly cured. Good to refrain all immoderate  
exercise,

### *A Prognostication.*

exercise, especially *Vener* this Moneth. Sleep but little in the day time all this Moneth, beware of taking cold, be cautious of Vomit, purge, or bleeding this Moneth. Refrain from *Potherbs* this Moneth, eat no *Cabages*, for they too much ingender *Melancholy*, and cause *Agues*: To eat *Sage* is profitable for the Body. Drink good and pleasant Wine, and eat both *Pullets* and *Veal*, for they much comfort the body, and use oft to eat *Cinnamon* in your meats. Our Forefathers were used to help many Infirmities of the body by anointing the same with an Ointment made of *Pennyroyal*, *Herbgrace*, *Fennel*, *Smallage*, the seeds of *Hysope*, *Bay-berries*, and *Allum*, unto which they added Oyl-olive, tempering altogether with Honey; to eat *Lettice* and all other things that be cold of qualiry is this Moneth good.

#### *Of Autumn.*

WHICH takes beginning this Year, *Septemb. 12.* on Thursday, a quarter before midnight, the Sun then entering the first scruple of *Libra*, producing the second *Æquinox* to all on this side the *Polar Circle*. It is called *Autumn* from *Augeo*, quia tunc fruges augentur. This season is by nature cold and dry; wherefore the *Sanguine* are now best in health, and the *Melancholy* subject to distempers; best for youth, but worst for age: When this season hath frequent *North winds*, and is dry, then are men and women of moist *Flegmatick* constitutions, best in health; but persons of other constitutions, are subject to *Fevers* and other distempers incident to their nature.

#### *September.*

In this Moneth eat all manner of meats and fruits that your stomach desires, for all things are now in their proper vigor and perfection. Good to purge, and to this end is highly commendable the flour of *Cassia* new drawn, that gently purgeth and comforts nature, and use cordial powders in your broths; these preserve the body sound till the next Spring. All *Simples*, *Roots*, *Fruits* and *Seeds*, may be well applied this Moneth, and used on all occasions, as being in their full perfection;

Go on

## SAUNDERS 1666.

*Goats milk* and *Pomegranats* eaten this Moneth are commendable, for that they both increase blood, and cause a good colour.

### October.

In this Moneth doth the Body wax dry, and the Brain moist; therefore it becometh to eat roasted meats often in this Moneth, and drink pleasant Wine, also drink new Wine, and eat pleasant meat often; *Goats milk* is held to be excellent good for this Moneth, because it purifieth the blood, and cleanseth the Lungs; its good to eat often *Appletarts* prepared with comfortable Spices and Sugar, for they comfort greatly the Stomack; but wash not the head in this Moneth. Let Blood and Purge as occasion requires; beware of eating too liberally of new Fruits; to eat the *Rhadiſh* root is wholesome, and to eat *Mustard* with your meats, is very commendable; all wild Fowls this Moneth are wholesome and good, and Cloves with Cinnamon in meats, sauce, drinks or cham-ped in the mouth, are very good.

### November.

In this Moneth *Melancholy* much increaseth, and blood decreaseth; its good to vomit sometimes. Eggs and Honey now are very wholesome, Salt powdred meats are good; this is the most perillous time in the Year to Bathe in, for the Blood is most restrain'd within the Arteries, and sweating either in Baths or Hot-houses, (for what is spoken of one, is to be understood of the other) stirs up the humors, and provokes distillations from the head, causeth dimness of sight, and pains in the eyes and head: This Moneth you may purge or bleed as need requires; the eating of Honey this Moneth, Ginger, Pulse, and Goats Milk, are very wholesome, and profitable to the body, for that they increase blood, and cause a good colour; and Cinnamon and Ginger drunk often this Moneth, give health, and are commendable, and beware you go not early forth of doors this Moneth, (those that can avoid it) because of Fogs and Mists, which greatly offend the Head and Stomack, but let the Sun have first some power on the Horizon.

## *A Prognostication.*

### *Of Winter.*

**T**HIS *Quarter* takes beginning this Year on Tuesday, the 11 of December, half an hour past 11 in the forenoon; then the Sun enters the first scruple of the Tropical sign *Capricorn*, forming shorter days to us, and all on this side the *Aequator*.

The Natural Temperament of this *Quarter* is Cold and Moist; from hence it is, that youth and cholerick people are in best health; but aged and *stegmatick* constitutions are most distempered. If the *Winter* be dry, and much abound with South Winds without Frost, it createth pains in the *Breast*, costiveness in the *Belly*, stopping of *Urine*, with sharpness, emulcerations, and inflammations. If it be ever long Frost, with little or no snow, it is a forerunner of a *Plague* the *Summer* following, as I hinted before,

The next Three Months. December, January, and February constitute this *Quarter*.

### *December.*

In this Month *Melancholy* and *Phlegm* much increase, which are heavy, dull, and cold, and therefore it behoves all that will consider their healths, to keep their heads and bodies very well from cold, and to eat such things as be of a hot quality. Broth made of *Coleworts* and *Onions* are good, *Cabbage* is very good, roasted *Onions* of themselves, or in sauce very good; roasted *Apples* or *Pears* after meats are greatly commended; the flesh of *Weathers*, *Rams*, and *Goats*, excellent food; *Capons* and all manner of *Land fowl* very wholesome, but no *Water fowl*. Bleed but little, and for necessities for in no Month in the Year the Body hath less Blood then now. Go not out of the house in the night, (unless necessity constrain) for the moist air of the night doth much harm the Body, *Parfly* *Roots* tenderly sodden, much comfort the stomach. Eat *Rape* *Roots* roasted under the Embers, all the Month for the Bodies health. *Cows* and *Swines* flesh is to be avoided, as being ever moist for the Body, and unwholesome food; and drink often *Wine* this Month. And Meats dressed with

*Honey,*

## SAUNDERS 1666.

*Honey, Cinnamon, Mace Nutmegs, Ginger, Grains, Cloves, Galingale, and such like, often drunk or eaten in this Moneth, do cherish the Blood, the Heart, and all the Body.*

### January.

In this Moneth abstain from bleeding as much as may be, and beware you take not cold after bleeding. If necessity compel, walk not abroad in the night. Use to eat the best Confections, and to drink often White Wine in this Moneth, because Plegm is very predominant. And to fast long, is very hurtful to the Body, but to eat *Winter Sallets* well prepared with Oyl and Spices, is much commended. A Bath or Hot-bath is good, and to take *Vomits* is not hurtful; also take once every morning (throughout this Moneth) for three hours before dinner, a little quantity of *Honey of Roses*, for that the same doth much comfort the stomack, and cleanse the body of choler and flegm. And to drink also these *Spices* with either *Wine or Ale*, as *Grains, Ginger, Nutmegs, Cloves*, and such like, are greatly commended this Moneth.

### February.

In this Moneth use to eat *Confections* candied with *Honey*, for that they purge the Body; to eat *Apples* is commendable; but to eat often fresh *Beef*, or other meats that be moist, or to eat any *Pot-herbs*, except *Parfly* and *Smallage*, is thought hurtful; and often eat boiled meat then roasted this Moneth, because the same doth keep the Body soluble. *Baths, Stoves*, to take *Potions*, and *Bleed*, are not hurtful. You may safely take *Pills* in this Moneth to purge the Head, as are very necessary, because the Head is more grieved, pained, dull, and heavy in this Moneth, then any other time of the Year; and to eat *Honey* with *Bread* in this Moneth, is much commended, for that the same doth both purge the Brest and Bladder.

*These considerations I thought necessary to add, because they may benefit many, and can hurt none; for in a right Regiment of Diet and Order, consists our natural well-being.*

*Astrological*

## A Prognostication.

*Astrological Elections of Times, briefly, yet fully and safely directing the right Administration of Physick and Phlebotomy.*

**T**He inevitable detriment that such blind Physicians as are ignorant of the Celestial Influences, bring to the Bodies and Conditions of Men and Women by their Chance-medly administrations is deplorable, and hath made me the more diligent in laying down those Rules and Grounds which may safely direct the wise and honest, and convince the wilfully obstinate.

That these following Rules are necessary to the very Essence of Physick administration, I need but refer them to their own great Masters, *Hippocrates* and *Galen*, and their Commentators, who chiefly call upon them for this knowledge, and esteem them blind and worse then Quacks without it, as *Almanus*, *Sine Clavo ac Remis Navigat, Naufragium tandem factum, qui absq; ulla temporum, Astrorum observatione, Medicinam facit*; est enim *Astologia oculum medici, cujus si fuerit expertus, cecus appellabitur.*

*Quamvis Medicina de se scientia sit perfecta ———  
Medicus tamen in opere suo, sine Astrologia, non est perfectus.*

As for instance, in the Method of Practice, let the Physician take the time he is first invited to a Patient, and erect a Schem of Heaven, and he shall find these verities.

First, if the Seventh House be afflicted by the presence or rays of the Malevolents, the Physician shall not cure.

Secondly, If the Tenth House be in like manner afflicted, his Physick is improper, and he will not rightly understand the Disease.

Thirdly, the Physician who first visits his Patient in the hour of *Saturn*, his Patient shall either be long sick, or long in cure; and shall not recover till both Physician and Patient almost despair.

Fourthly, he that first enters upon a Cure in the hour of *Mars*, shall finde his Patient disaffected to him, and disdain or reject his Medicines, his pains ill rewarded, and his person slighted; the same if the Moon be void of course, unles in *Taurus* or *Cancer*.

Fifthly, he that makes choice of the hours or good Aspects of *Jupiter* and *Venus*, shall have good words from the sick, be well esteemed and paid for his pains; nay, though he fail in the cure, yet shal he receive no prejudice therby (I mean) in his estimation.

The verity of these few particulars will prompt the ingenious to further inquisition: As,

To take notice of the *Crisis*, according to which diversity of Distempers appear; as also with *Hippocrates* to observe the Cosmical rising of many Stars violently hot, of which nature are these, *Procyon*, *Syrius*, *Pegasus Equus*, *Capella*, *Hercules*, *Antares*, *Pallidum*, and others, which are proper causes of Epidemical Diseases.

*Phlebotomy* being of such consequence to the Body humane; it is of necessity that there be a skillful, judicious and circumspect consideration had, as to the causes and ends inducing thereunto: As, whether it be proper for the Patient to bleed, for the evacua-

ting

# SAUNDERS, 1666.

viag of some naughty and superfluous peccant humor; for other-  
 wise *blood-letting* is of dangerous consequence, and openeth a way  
 to many inconveniences and infirmities. And note generally, that  
 it is not convenient for a *lean* and *weak* man, and for a very *fat*  
 and *gross* man to be let blood; neither for a *child* under fourteen  
 years of age, nor an old man above fifty and six: Moreover, let  
 not blood when the *Moon* is either in *Gemini* or *Leo*; for she hath  
 power of the *Arms*, the other of the *Heart*: to which some late  
 Writers, (I know not for what reason) have added the latter  
 half of *Libra*; but the other Signs are good for *Plebotomy*, ac-  
 cording to this following Method.

For the Com- plexions, blood the	{	Phlegmatick	} the )	{	♊ or ♋
		Melancholick			♌ or ♍
		Cholerick			♎ or ♏
		Sanguine			♐ or ♑

For his *Youth*, from the Change to the first Quarter.  
 Age, let *Middle age*, from the first Quarter to the Full.  
 blood *Elder age*, from the Full to the last Quarter.  
 in his *Old age*, from the last Quarter to the Change.

*Times of the Year.*

*Spring* good, *Harvest* indifferent.

*Time of the Day.*

*Morning*, after Sun-rising, fasting; afternoon, after per-  
 fect digestion, the air temperate, the wind not south.

*Not good to bleed.*

At the *change* of the *Moon*, nor two days before nor  
 after; ☿ ☿ or ☐ of ♄ ♀ forbiddeth the opening  
 of a vein for 12 hours before, and 10 hours after; ☿ of  
 the *Moon* with the *Dragons* head or tail, and the ☿ ☿  
 or ☐ of the *Moon* to ♄ or ♀ forbids to bleed a day be-  
 fore or after; ♀ combust not good.

*Good to let blood.*

The ☾ in ☿ \* or △ or within the rays of ♄ and ♀  
 when the Sun shall be in △ or \* with ♄ or ♀ when ♄  
 and ♀ aspect each other with △ or \*, or be in ☿; so  
 likewise when ♄ and ♀ shall radiate themselves by △  
 or \* aspects of the ☾ to ♄ and ♀ are not hurtfull.

♀ being fortunate, and not afflicted, his aspects are  
 good; hurtfull, if contrary.

The ☾ void of course forbids not the letting of blood.

*Directions*

# *A Prognostication.*

## *Directions after Bleeding.*

Sleep not presently, stir not violently,  
Use not Venery, feed thou warily.

Notwithstanding, for the *Phrensie*, the *Pestilence*, the *Squinancy*, the *Plurisie*, the *Apoplexie*, a continual *Head-ach*, growing of *Choler* and *Blood*, a hot burning *Fever*, or any other extreame pain, in this case a man may not tarry a chosen time, but incontinently with all convenient speed he is to seek and use his remedy, as if a chosen time might be respected.

## *Rules for giving Purges.*

The ♀ in ☿	☿ purge melancholy	} with E- lectua- ries.
in * or △	☉ purge phlegm	
with	♀ purge Choler, ♀ not combust	
The ♀ in ☿	☿ purge melancholy	} with Poti- ons.
in * or △	☉ purge phlegm	
with	♀ purge choler, ♀ not combust	
The ♀ in *	☿ purge melancholy	} with Pills.
in * or △	☉ purge phlegm	
with	♀ purge choler, ♀ not combust	
The ♀ in ♀	☿ purge melancholy	} with any kind of medicine.
or ☿ in *	☉ purge phlegm	
or △ with	♀ purge choler, ♀ not combust	

These are the common Rules for purging; but indeed I never could much approve of the ♀ being in ☿ or \*, especially when she is in △ or \* of ♄.

Good to	Prepare humours	The ♀ in	☿ ☿ or ☿
	Vomit		☿ ☿ or ☿
	Purge by sneezing		☿ ☿ or ☿
	Take Glysters		☿ ☿ or ☿
	Take Gargarisms		☿ ☿ or ☿
	Stop Rheums and Flux		☿ ☿ or ☿
	Bathe for cold diseases		☿ ☿ or ☿
	Bathe for hot diseases		☿ ☿ or ☿

For further satisfaction in this point, I refer the Reader to my Book of Elections, 1688 Year made publike.

And it is now the second time printed with very many Additions, (no ordinary Observations) both of *Palms*, of *Physiognomy*, of the Moles of the Body; and in every part much enlarged by the Author, and printed (as before) for Mr. George Sawbridge at the Bible on Ludgate Hill.

From my House at the three Cranes in Chancery Lane. FINIS.
